

## P-Link

Endura Adhesion promoter P-Link, is designed to achieve excellent adhesion on PolyPropylene.

### Product Features

- ◆ Fast drying
- ◆ Excellent hold out
- ◆ Non-corrosive
- ◆ Solvent-base
- ◆ Easy to use

### Theoretical Solids Content:

Volume: 4% ± 1%

### Shelf Life\*

Single Component: (2) year

\*For unopened product.

### Pot Life of Mixed Product:

10 Hours\* @ 77°F (25°C) and 50% RH

### Suitability

Endura P-LINK can be applied over polypropylene to achieve excellent adhesion between a polypropylene substrate and EX-2C Topcoat.

### Surface Preparation

Surface must be washed and cleaned.

### Mixing ratio

Endura P-Link is ready to spray.  
No reduction is necessary

1. \_\_\_\_\_  
2. \_\_\_\_\_  
3. \_\_\_\_\_

### Application Method

- ◆ Apply one thin wet coat.
- ◆ Topcoat can be applied as soon as the primer has been dried.

### Cover rate

approx. 300 sq.ft / 0.2 mils / gal.

### Drying time

Dry to topcoat: 30-60 mins at room temperature
