

MARINE COATING SOLUTIONS

Endura has developed products for both fresh and saltwater environments. Endura Coating Systems provide protection for marine equipment ranging from personal watercraft to sailboats to commercial fishing vessels.

The Endura "Bottom Coat System" of EP-Hi-Build Epoxy Primer provides years of below the water-line protection.

Above the water-line, Endura Coatings provide superior protection from ultraviolet rays. The signature high gloss, durable finish of our polyurethane coatings enhances the appearance and extends the life of marine equipment.

BELOW THE WATER-LINE
