UltraFlex

High Performance Protective Coating

Endura UltraFlex topcoat is an elastomeric, high performance polyurethane coating for protecting all surfaces. Endura UltraFlex creates a highly flexible, and impact resistant layer to protect your vehicle from the damage caused by rocks, road debris and the elements.

Reduce the costs of rock chip repairs and increase the service life of your coatings with Endura UltraFlex paint protection.

Provides complete protection to your paint finish on:

- > Fleet vehicles
- > Service rigs
- > Trucks, trailers and tankers
- > Structural items including, lamp posts and road signs

Product Features:

- > Extreme flexibility and durability
- > Outstanding impact and abrasion resistance
- > Available as a clear coat or in gloss black or white
- > Provides a high gloss finish
- > Can be applied as a topcoat or used as a midcoat under EasyClean to provide an impact resistant easy to clean paint system
