New Product – Endura 1K and 2K aerosols

Endura Paint is introducing 1K and 2K aerosol spray bombs. The system allows for Endura products to be packaged in one component or two component spray bombs. Endura 1K and 2K Sprays are easy to use and require no equipment (air compressors, spray guns etc...).

The 1K and 2K aerosols are excellent for touch ups and repairs or for painting small projects. The Endura 1K and 2K systems provide over twice the solids levels compared to typical aerosol products, and the professional spray nozzle and advanced propellant system provide far superior spray quality and surface finish.

Product Information:

Endura 1K aerosols are currently available in the following products:

- ◆ V-Link
- ◆ P-Link
- ◆ Lucent

Endura 2K aerosols are currently available in the following products:

- ◆ EX-2C Topcoat (all colours)
- ◆ Delta Urethane Primer

Paint Volume: (approx 4oz)

For information on product usage please refer to the contents TDS and MSDS information.

The Endura website also has TDS information on using, activating and cleaning the 1K and 2K spray bombs. This information is available online at www.endura.ca/spray.html

**About Endura Manufacturing Co. Ltd.**

Endura Manufacturing Co Ltd, an Alberta, Canada based company was incorporated in 1966 with the objective of developing and marketing specialty paints and coatings. Endura manufactures industrial paints and coatings using the highest quality raw materials. Endura paints and primers achieve outstanding performance in aggressive, corrosive, and abrasive environments. They are relied upon to be easy-maintenance, retaining gloss and color even with exposure to severe industrial cleaning methods.

Through years of research and development Endura has created paint systems designed to work in the harshest environments, from off shore oil rigs to gravel trucks, providing an easy to spray, long lasting coating that will protect your investment for years to come.
