New Product – Endura Release Anti Graffiti
Complete Graffiti Protection

Endura Release is a non-sacrificial polyurethane topcoat, developed to protect painted surfaces from graffiti.

Endura Release is available in over 40,000 colors, and can be custom matched to existing finishes to provide a seamless look.

Endura Release is also available as a clear coat, for protecting existing painted surfaces. Endura Release Clear has been used to protect murals and outdoor art projects, providing a tough, non-stick surface that is easy to clean and provided years of gloss and protection from graffiti as well as dirt and grime.

Endura has also developed a special waterborne barrier coat (V-Link) which is used with Release to protect solvent sensitive finishes. Endura V-link is applied to the existing painted surface, allowed to dry and then it is topcoated with Endura Release Clear.

Endura Release was designed for the municipal marketplace and will provide complete protection against unwanted graffiti on:

- ◆ Lockers
- ◆ Bathroom stalls and doors
- ◆ Transit buses, trains and shelters
- ◆ Lamp posts and signage
- ◆ Murals and outdoor displays

Endura release is also an excellent choice for hard to clean surfaces, such as roll gates and shutters.

Endura Release is currently on sale and is available in all the same colors as Endura EX-2C Topcoat. Please contact your Endura distributor and request an Endura Release demo kit. The kit includes test panels and additional product brochures.

About Endura Manufacturing Co. Ltd.

Endura Manufacturing Co Ltd, an Alberta, Canada based company was incorporated in 1966 with the objective of developing and marketing specialty paints and coatings. Endura manufactures industrial paints and coatings using the highest quality raw materials. Endura paints and primers achieve outstanding performance in aggressive, corrosive, and abrasive environments. They are relied upon to be easy-maintenance, retaining gloss and color even with exposure to severe industrial cleaning methods.

Through years of research and development Endura has created paint systems designed to work in the harshest environments, from off shore oil rigs to gravel trucks, providing an easy to spray, long lasting coating that will protect your investment for years to come.
