

EP-521 Low VOC

Endura EP-521 Low VOC Epoxy Primer is a high solids two-component primer designed for high impact resistance over a wide range of surfaces. It is specially formulated to fill a sandblast profile in one coat. This is our most durable primer for equipment.

New Product Name:
EP-521 Low VOC

Release Date:
August 02, 2011
(Beige)

Attachments:
See website for complete
product details

Benefits of EP-521 Low VOC:

- ◆ Formulated for use where high impact resistance is required
- ◆ High solids formulation fills a sandblast profile in one coat
- ◆ No induction time required
- ◆ Up to a 3 day topcoat window
- ◆ **VOC Compliant**

Additional Information:

Datasheets, MSDS and product brochures for EP-521 Low VOC are available on the endura.ca website.

Endura EP-521 Low VOC

Endura is pleased to announce the release of a new version of the Low VOC EP-521 coating.

The changes made to this new version will provide applicators with greater flexibility in achieving their desired spraying viscosity; depending on the ambient conditions, spray equipment used, and on the surface finish that is desired.

The new formulation will replace Endura's current Low VOC formulation and the product will have a batch # on or after B070404. (New formula stickers will be on the lids)

F.A.Q

Q: Why was the EP-521 Low VOC reformulated?

A: The EP-521 low VOC was reformulated so that it's spraying viscosity and thinning requirement more closely matched the original EP-521 (non-compliant)

Q: Will the EP-521 still be available in various colors?

A: EP-521 Low VOC will be offered in the following colors.

- Beige#1 – Product Currently Available
- Black#1 – Product Currently Available
- Blue#20 – Product Currently Available
- Green#15 – Product Currently Available
- Grey#5 – Product Currently Available
- Red#25 – Product Currently Available
- Red#26 – Currently in Development
- White#1 – Product Currently Available
- Yellow #3 – Currently in Development
- Yellow #22 – Currently in Development

EP-521:

Endura is committed to providing world class coatings that are environmentally responsible. To further this goal, Endura will no longer be producing the non-compliant version of this primer.

(Production of non-compliant colors will be discontinued)

New Thinning Instructions:

This product will require thinning

- ◆ To maintain compliance thin EP-521 Low VOC with Endura Low VOC Epoxy Reducers.
[FTH0016] Low VOC Epoxy Reducer- Regular (VOC = 0 g/L, 0 lbs/gal)
[FTH0027] Low VOC Epoxy Reducer- Slow (VOC = 0 g/L, 0 lbs/gal)

EP-521 Low VOC is below 250 grams/liter (2.1 lbs/gallon)

Please note: Other colours will be made available if required. Please contact your sales representative for information on minimum quantities, lead times and restrictions.
